PROJECT

Weather Search App

<https://practice-mobile-app-colour.netlify.app/>

- Allows users to check real-time weather conditions worldwide.
- Integrated weather API to fetch and display live data, including temperature, humidity, and forecast.
- Designed clean layouts and interactive elements to enhance user experience on both desktop and mobile devices.

Beauty Spa Website

<https://nature-spa.netlify.app/>

- Built a luxury spa website using HTML, CSS, JavaScript and React.
- Implemented an online booking system with dynamic form handling that submits reservations to Google Sheets, enabling easy appointment tracking.
